I am a Mathematics graduate and a self learned programmer. From the beginning of my undergraduate life, back in 2014, I have been learning computer programming and loving it so much. Since then, I have learned various different languages and frameworks. As I was learning by myself, I was unable to figure out where I am actually good at. From Web to Android Development, Machine learning and Deep learning; I have tried to learn many of them by time. Recently, in 2018, I have found a front end Javascript framework called React, very interesting. I have done couple of projects using React and it seems I have found my most comfortable area in computer programming. Now I want to apply my this little experience, and acquire more knowledge by working with a team or a company.

🔧 Personal Projects

🌐 Movie Review

🔗 movie-review-03.netlify.com

📁 This is site where someone can Signup and Login using email and password. And write a review of a movie. Here Notification function is used from firebase.

➤ **React, Redux, Firebase**

🌐 Game Ranking System

🔗 game-ranking-system.netlify.com

📁 This is a Ranking System for Foosball game.

➤ **React, Redux**

🌐 Mojar Store

🔗 mojar-store.netlify.com

📁 This is online shopping store with cart facility and checking out with Paypal.

➤ **React, React Context, React Paypal Express Checkout**

🏛 Education

BSc (Hons) in Mathematics
University of Barisal
Barisal, Bangladesh

⚙ Technical Skills

📄 HTML

📄 CSS

📄 Javascript

🌸 React

🏠 Express

📄 MongoDB

📄 Firebase

🐍 Python

🔗 Git

🐧 Linux

🎓 Certifications

🌟 Neural Networks and Deep Learning

coursera.org/account/accomplishments/certificate/64Xl

Certified By: **Coursera**

🌟 Convolutional Neural Networks
